SeaFlex®

The rejuvenating and regenerating supplement for pets

for dogs and cats

On the move again

Do you want to give your pet a new lease on life?

Is your pet slowing down?

Dogs and cats enter their senior years around age seven, often beginning to develop issues associated with aging. In the early stages, these signs often go unnoticed and, if ignored, can lead to serious problems or chronic conditions. This is why it is so important to support your pet's health throughout its life.

Getting older for a dog or cat generally means slowing down. You may notice that your pet:

- Sleeps more
- Is stiff when getting up
- Has trouble getting around
- Has a dull and lifeless coat
- Is less playful
- Is lethargic
- Has a depressed appetite
- May need to take tablets or powdered supplements that they don't especially like

SeaFlex®
The rejuvenating and regenerating supplement for pets

SeaFlex®

The rejuvenating and regenerating supplement for pets

What is SeaFlex?

Scientifically designed using latest research findings, **SeaFlex®** is a revolutionary bio-marine nutritional supplement. It is rich in important antioxidants, marine carotenoids, amino acids, marine trace minerals, branched-chain fatty acids, high levels of vitamins and minerals, seaweeds/sea vegetables, as well as a **UNIQUE** and patented deep, cold water source of marine nutrients.

The best thing about **SeaFlex®** is that it is **EASY** – dogs and cats **LOVE IT**. It has a chewable 'treat' formulation (sticks for dogs and kibble for cats), which is incredibly palatable. **SeaFlex®** is also **ALL-NATURAL**, made with only select quality meats and human-grade ingredients, and contains no artificial flavours or nasty preservatives. Given once a day, it is a healthy 'treat' for your pet.

Being natural, there is added **SAFETY** too. **SeaFlex®** can be safely used with any other medications and feeds as prescribed. This effective formulation and patented process is the result of over 10 years of research, with years of **PROVEN RESULTS** in the USA, Australia, UK and New Zealand.

How can SeaFlex help my cat or dog?

Does it sadden you to see your pet not as playful or 'happy' as they used to be? Perhaps they don't run to greet you when you come home anymore. Does your dog not chase a ball like it used to, or do you miss the walks you used to take together?

Maybe you miss your cat jumping up into your lap? Does your pet seem more lethargic than before, sleeping most of the day or having trouble getting around? Does its once shiny and beautiful coat now look dull and lifeless?

- **SeaFlex®** aids **VITALITY** and **ENERGY**, helping your pet to keep its youthful and playful behaviour - back to how it 'used to be'.
- **SeaFlex®** helps to support the structural framework of **JOINTS** and **CARTILAGE** for ease of movement.
- **SeaFlex®** promotes **HEALTHY SKIN** and a **SHINY COAT**.

How is SeaFlex different?

Are you tired of waiting for a month or two just to see if a product is even going to work?

Different from other products on the market, **SeaFlex® WORKS FAST!**

- **SeaFlex®** is made with an advanced patented processing method which keeps ingredients stable, retains the high level nutritional value and ensures increased synergistic action of the vitamins, minerals and trace elements.
- **SeaFlex®** shows quicker uptake by the body with **FAST RESULTS**. You will usually see a noticeable change in your pet within about 10 days (sometimes as fast as 3 days)!

Pet owners consistently comment that they can actually "see the difference in their pet's health and vitality."

*The ocean offers an immense source of health-enhancing wonders. **SeaFlex®** contains a unique blend of marine ingredients not available in other commercial supplements.*

Contains high levels of important natural carotenoids

- Carotenoids are potent antioxidants (Antioxidants help to protect cells and tissues from the damaging effects of free radicals, which contribute to a long list of chronic health problems. Antioxidants are also key in balancing inflammatory response.)
- Carotenoids help to support the immune system.

Rich in natural mucopolysaccharides

- These are the main components of connective tissue surrounding collagen and elastin fibres.
- They help to support joint health and skin care.

Contains an exclusive variety of sea cucumber (*Cucumaria frondosa*) which exhibits similar attributes to that of cold water deep sea fish, but with added benefits

- Extremely broad nutrient content containing, among many others, mucopolysaccharides, vitamins A, B1 (thiamine), B2 (riboflavin), B3 (niacin) and C, as well as minerals, calcium, iron, magnesium and zinc.
- Harvesting practices are strictly regulated, using the highest environmental sensitivity to ensure a sustainable population.

Sea Cucumber

The Chinese have treasured sea cucumber since ancient times for prevention of disease and as a longevity tonic. Traditional Chinese Medicine commonly uses sea cucumber for weakness, debility of the aged and issues associated with getting older.

Contains natural fucoidan

- Fucoidan is a sea-derived substance, a sulfated polysaccharide, found primarily in certain seaweeds, kelp and sea cucumber.
- It has strong health supporting properties for overall health and wellbeing.
- Fucoidan is also a powerful tool for supporting immunity.

SeaFlex® supports the different needs of dogs and cats

- **SeaFlex®** for Dogs and **SeaFlex®** for Cats are scientifically formulated for each species to support their specific nutritional needs.
- The **SeaFlex®** for Cats formulation contains added Taurine (healthy heart and vision) and Proline (healthy skin and shiny coat).
- Did you know that cats and dogs have different palates and actually prefer different flavours? **SeaFlex®** for Dogs and **SeaFlex®** for Cats have been designed to suit each species' individual tastes, and to satisfy even the fussiest of eaters.
- **SeaFlex®** for Dogs is a semi-moist stick and **SeaFlex®** for Cats is a semi-moist kibble. Both are soft and easy to chew, and highly digestible, so ideal for older pets.

SeaFlex® is perfect for dogs or cats that won't accept tablets or powders

- Dogs and cats love the delicious taste of **SeaFlex®**, and consider it their own special treat. Many pets actually beg for it!

Peter Collin
Founder and Managing Director of Coastside Bio Resources

"For centuries sea cucumbers have been a staple in Asian medical formulations aimed at retaining health and retarding the effects of aging and disease. It is exciting to now see these traditional benefits of sea cucumber foods, and Coastside's more than ten years of scientific research with sea cucumbers, being confirmed in scientific peer-reviewed journal articles that dig deeply into the biochemistry of "vitality."

***SeaFlex®** is unique not only for its higher potency and exclusive blend of ingredients, but also for its fast-action and its health-supportive applications. On a more personal note, the best part of the work I do is seeing the miraculous, life-changing gift **SeaFlex** gives to so many pets."*

Try it and see for yourself why **SeaFlex®** gets a 5 star rating from vets, pet owners and especially dogs and cats. Ask your vet today how **SeaFlex®** can help your dog or cat.

Give your dog or cat a new lease on life with SeaFlex®.
