# Cotton Wool

## General Description

Soft and absorbent cotton wool roll.

## Features & Benefits

- Each roll is interleaved for easy application.
- Individually wrapped rolls.

## Recommended Uses

- First aid applications.

PHYSICAL CHARACTERISTICS	30cm width
PACK SIZES	375g roll (VAL1950)

# Gauze and Cotton Wool

## General Description

Highly absorbent gauze covered cotton wool.

## Features & Benefits

- Thick, even layer of high quality cotton wool throughout the roll.
- Each roll is individually wrapped.

## Recommended Uses

- First aid applications.

PHYSICAL CHARACTERISTICS	30cm x 1.8m
PACK SIZES	216g roll (VAL2750)

# Dermatopic Wound and Ear Cleanser

First Aid

Wound and ear cleanser for horses, dogs and cats 

## General Description

Aids in the removal of necrotic tissue, coagulum and debris from wounds in horses, dogs and cats. Also for use as an adjunct in the treatment of otitis externa, and for the removal of accumulated wax deposits in dogs and cats.

ACTIVE CONSTITUENTS	per mL
Propylene glycol	415mg
Malic acid	22.5mg
Benzoic acid	1.5mg
Salicylic acid	0.37mg

## Features & Benefits

- Gentle enough to be used on puppies and kittens.
- Specifically formulated with organic acids to cleanse wounds and ears without irritation.
- Promotes healthy tissue renewal.
- Pleasant scent

## Directions for Use

*Wounds:* Apply liberally to clean the wound. Repeat application 2-3 times daily as necessary, or as directed by a veterinarian.

*Ears - Routine Cleaning:* Gently squirt solution liberally into the ear canal and massage the base of ear to loosen wax deposits. Repeat as required. Wipe outer area of ear with cotton wool afterwards to remove any excess liquid.

*Otitis externa:* Follow directions as for Routine Cleaning, repeating procedure 1-3 times daily for several days, or as directed by a veterinarian.

## Precautions

- Ensure that there are no other ear problems, such as the presence of grass seeds. It is important to obtain the correct diagnosis before commencing the use of this product. If no improvement is then noted, further consultation with a veterinarian is required.
- For topical use only.

PHYSICAL CHARACTERISTICS	Clear liquid
PACK SIZES	125mL (squeeze-pack with nozzle) (VAL1960)
	500mL (spray) (VAL1961)
STORAGE	Store below 30°C

## Medicated Poultice Dressing for Horses

### General Description

Equitex® is an easy to use, non sterile, all purpose poultice dressing which can be used as a hot, cold or dry dressing.

ACTIVE CONSTITUENTS	per g
Boric Acid	60mg

### Features & Benefits

- Multi-layered wound and poultice dressing.
- High quality cotton dressing with a non woven gauze covering and a plastic cover on the reverse side.
- Non abrasive cover, making it gentler on the skin.
- Extensively trialed with leading equine veterinarians, horse trainers and horse studs.
- Retains shape when wet (will not stretch or fall apart).
- Also contains Tragacanth.

### Precautions

- Equitex® should not be used in conjunction with any other medical preparations except on the advice of a veterinarian.
- Consult a veterinarian before applying the poultice to infected wounds.
- Ensure the bandage is not applied too tightly and that the poultice is not too hot.

PHYSICAL CHARACTERISTICS	20cm x 40cm multi-layered poultice dressing
PACK SIZES	Single 44g (VAL2535) Available in a display box of 10
STORAGE	Store below 30°C

Elastic adhesive bandage for large and small animals

General Description

A heavyweight adhesive elastic bandage.

Features & Benefits

- Great elasticity and adhesion.
- User friendly - plastic lipped core ensures ease of use and no product wastage.
- Each roll is individually wrapped.
- Available in 3 widths – 5cm, 7.5cm and 10cm.

Recommended Uses

For use where medical application is needed, either over dressings or support wraps.

PHYSICAL CHARACTERISTICS	2.7m
PACK SIZES	5cm x 2.7m (VAL8805)
	7.5cm x 2.7m (VAL8807)
	10cm x 2.7m (VAL8810)
	All sizes available in single rolls or display outers of 12

## Cohesive bandage for large and small animals

### General Description

Cohesive, highly conforming, self-adherent bandage that sticks to itself and not to the animal.

### Features & Benefits

- Will not leave sticky residue.
- Breathable and water-resistant, and does not shrink when wet.
- Thick and strong.
- Can be torn to length by hand and applied without clips, pins or fasteners.
- Can be auto-claved.
- Each roll is individually wrapped.
- Single rolls available in 10cm widths.
- Assorted colours available.
- The dispensing tower packs (10s) are available in 5cm and 7.5cm with 5 assorted colours per pack and paw print design on bandages.

### Recommended Uses

For use where medical application is needed, either over dressings or support wraps.

PHYSICAL CHARACTERISTICS	4.5m (stretched)
PACK SIZES - Single Colours	10cm x 4.5m rolls (stretched) Black (VAL8910), Pink (VAL8911) Blue (VAL8913), Red (VAL8914), White (VAL8915) All colours available in display outers of 12s
	5cm x 4.5m (stretched) (VAL8905) 7.5cm x 4.5m (stretched) (VAL8907) Each tower dispenser contains 10 rolls (2 of each colour with paw print design: Pink, Green, Yellow, Orange and Blue)
PACK SIZES - "PAW Packs"	

# Veterinary Curabine Dressing

## First Aid

### General Description

A high quality, highly absorbent combine dressing with a non-woven, low adherent, tubular, soft cover.

### Features & Benefits

- Soft, non-woven gauze covering an even firm cotton wool layer.
- Non-stick and highly absorbent.
- The absorbent cushioning protects the wound site to further prevent disruption and irritation.
- Can be autoclaved.
- Suitable to use for protection padding of wounds and injuries.
- Can be used as protection, support and insulation for horses during exercise, competition or travelling.

### Directions for Use

Veterinary Curabine Dressing can be cut easily to any required size or width. Secure dressing with a high quality cohesive or adhesive bandage such as ValuWRAP or ValuPLAST. Take care not to bandage legs too tightly. Make sure that when wrapping legs to apply even pressure to avoid folds and uneven overlap of dressing under bandage, especially on known pressure points.

### Recommended Uses

Veterinary Curabine Dressing has a range of applications, and can be used as a dressing for wound management, support padding, leg wraps and insulation.

#### PHYSICAL CHARACTERISTICS

30cm x 3.2m

#### PACK SIZES

500g roll (VAL1955)

# Canine All Wormer

Broad spectrum wormer for use in dogs for the treatment and control of gastrointestinal worms.

ACTIVE CONSTITUENTS	10kg tablet	ACTIVE CONSTITUENTS	40kg tablet
Praziquantel	50mg	Praziquantel	200mg
Oxantel Embonate	542mg	Oxantel Embonate	2,168mg
Pyrantel Embonate	143mg	Pyrantel Embonate	572mg

## Features & Benefits

- Controls of all susceptible gastrointestinal worms in dogs including: roundworms, whipworms, hookworms, tapeworm, plus the hydatid tapeworm.
- Specially formulated to remove the bitter taste normally associated with preparations containing praziquantel.
- Can be administered in conjunction with heartworm preventatives such as Valuheart® or flea & tick treatments.

## Directions for Use

*Puppies:* Treat at 2, 4, 8 and 12 weeks of age and then every 3 months.

*Adult dogs:* Treat regularly every 3 months for the animal's lifetime. If Whipworms are known to be present, treat every 6 to 8 weeks after 3 months of age. In hydatid areas, dogs should be treated every 6 weeks.

*Pregnant and lactating bitches:* Treat prior to mating, 10 days before whelping and then every 3 months.

- Can be administered with or without food.

## Treatment Recommendations

*Small and Medium dogs:* use Canine Allwormer Tablets for Dogs: 1 tablet per 10 kg bodyweight. Dosage should be rounded up to the nearest quarter tablet.

*Large dogs:* use Canine Allwormer Tablets for Large Dogs: 1 tablet per 40 kg bodyweight. Dosage should be rounded up to the nearest half tablet.

*Untreated dogs:* Untreated dogs may be heavily infested and so require weekly dosing for the first 2 - 4 weeks and then every 3 months.

If Whipworms are known to be present, treat every 6-8 weeks after 3 months of age. In Hydatid areas, the dogs should be treated every 6 weeks.

*NOTE:* Canine All Wormer does not treat heartworm (*Dirofilaria immitis*).

PHYSICAL CHARACTERISTICS	 10kg tablet: round tablet  40kg tablet: long oval tablet
PACK SIZES	10kg tablets: Box 2s (VAL1200) Box 6s (VAL1202) 40s jar (VAL1204) 100s jar (VAL1205) 40kg tablets: Box 2s (VAL1216) 25s jar (VAL1219), 70s jar (VAL1220) All box sizes (2s & 6s) available in display outers of 10s
STORAGE	Store below 30°C. Store in original container away from foodstuffs

Monthly heartworm tablets for dogs

General Description

Valuheart Monthly Heartworm Tablets prevent heartworm disease in dogs by eliminating the tissue stage of heartworm larvae that infected the dog in the month (30 days) before treatment.

SIZE	Ivermectin per tab
Small Dog (up to 10kg)	60mcg
Medium Dog (11kg - 20kg)	120mcg
Large Dog (21kg - 40kg)	240mcg

Features & Benefits

- The active ingredient in Valuheart is evenly dispersed throughout the tablet, which means you can cut the tablets into halves to treat required bodyweight.
- Does not contain any artificial flavours or colours.
- Has a wide safety margin for dogs of all breeds, including stud dogs, breeding bitches and puppies 6 weeks of age and older.

Directions for Use

Give one tablet orally at monthly intervals of the appropriate sized tablet relative to the dogs weight. Use the enclosed stickers on your calender each month as a reminder of when to give the tablet. If it is suspected that any of the dose has been lost, redosing is recommended.

Precautions

- Do not administer to puppies under 6 weeks of age.
- All dogs should be tested by a veterinarian and be free of heartworm before using this product.

PHYSICAL CHARACTERISTICS	Small:  Medium:  Large: 
PACK SIZES	Small: 6 x 60mcg tablets (blue) (VAL8420) Medium: 6 x 120mcg tablets (green) (VAL8424) Large: 6 x 240mcg tablets (gold) (VAL8426) All sizes available in display outers of 10s
STORAGE	Store below 30°C

Broad spectrum anthelmintic for cats

General Description

A broad spectrum anthelmintic for the control and treatment of gastrointestinal worms including roundworms, hookworms and tapeworms in cats.

ACTIVE CONSTITUENTS	per mL
Praziquantel	10mg
Pyrantel (as embonate)	40mg

Features & Benefits

- One syringe of Valucat will treat up to 8kg bodyweight.
- Safe for older cats, kittens over 6 weeks of age, pregnant queens and show animals.

Directions for Use

The paste should be administered between the mouth and the back teeth, as far back on the tongue as possible. Carefully depress the syringe plunger to give the correct dose. Alternatively, paste may be mixed with food.

Treatment Recommendations

*Kittens:* Treat at 6, 8 and 12 weeks of age, and then every 3 months.

*Adult cats:* Treat regularly every three months.

*Pregnant and lactating queens:* Treat prior to mating, 10 days before kitting, and 2 to 4 weeks after kitting.

Optimum control of intestinal worms is achieved by adequate flea control and by daily disposal of droppings, where possible, as well as controlling intermediate hosts (including rats and mice). Flea tapeworms can reinfect cats and begin producing segments 2 - 3 weeks after treatment. If segments appear before the next scheduled dosing of the allwormer, re-treat. If worm problems persist, or if the infestation is heavy, consult a veterinarian.

Precautions

- Do not administer to kittens under 6 weeks of age.

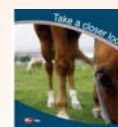

PHYSICAL CHARACTERISTICS	Yellow paste
PACK SIZES	4mL Syringe (VAL8300) Available in display outers of 12s
STORAGE	Store below 30°C

## Broad spectrum benzimidazole anthelmintic for horses

### General Description

Broad spectrum benzimidazole (BZ) group anthelmintic with a wide safety margin for use in horses. Oxfendazole interferes with the metabolic pathways of intestinal parasites and sterilises worm eggs within 24 hours of dosing, thus reducing contamination. Equinox is effective against the adult and immature forms of the large roundworm (ascarids), pinworms and hairworms, susceptible small strongyles, adult small stomach worms, tissue stages of large strongyles (bloodworm), and immature and adult stages of large strongyles in the intestine. Aids in the control of the migrating stages of the bloodworm *Strongylus vulgaris*, with corresponding reduction of arterial lesions. A reduction in the prevalence of associated colic could be expected.

ACTIVE CONSTITUENTS	per kg
Oxfendazole	185g

### Features & Benefits

- Broad spectrum wormer.
- Active ingredient belongs to the BZ family.
- Palatable and readily accepted by horses.
- Safe to use in foals, yearlings, stallions and pregnant mares.

### Directions for Use

Horse: 5mL per 100kg bodyweight. Dose is graduated in 50kg settings to 600kg. One tube will treat 600kg bodyweight. Place the tube into the side of the mouth and press the plunger, ensuring that the paste is as far back over the tongue as possible. Alternatively, mix it in with feed.

### Treatment Recommendations

All horses should be included in a regular parasite control program. Because reinfection is common, treatment must be repeated routinely for effective control. Consult a veterinarian if there is a heavy worm burden in the horse, or if the worming program of the horse is unknown.

### Precautions

- It is not recommended to use in foals under 6 weeks of age.
- Does not control bots or tapeworms.

Equine Worming Booklet now available!  
Contact 1300 787 041 for your copy

PHYSICAL CHARACTERISTICS	Paste
PACK SIZES	32.6g tube (VAL2525) Available in display box of 20s Stud Bucket of 50 tubes (VAL2528)
STORAGE	Store below 30°C Protect from light

# Worming

## Next generation allwormer paste for horses

### General Description

Expel is effective against tapeworm, small strongyles (redworms) and large strongyles (bloodworms), pinworms, roundworms (ascarids), hairworms, large mouth stomach worms, neck threadworms, bots, lungworms and intestinal threadworms. Kills worms and bots (including benzimidazole resistant strains) in horses.

ACTIVE CONSTITUENTS	per g
Abamectin	4mg
Morantel tartrate	167mg

### Features & Benefits

- Broad spectrum allwormer - treats and controls worms, bots and tape.
- Cross active formulation.
- Palatable aniseed flavoured paste.
- Safe to use on foals, yearlings, stallions and pregnant mares.
- Well suited to be the major product for treating foals 6 weeks – 24 months.

### Directions for Use

*Horse:* 5mL per 100kg bodyweight. One tube will treat 600kg bodyweight. Place the tube into the side of the mouth and press the plunger, ensuring that the paste is as far back over the tongue as possible. Alternatively, mix in with feed.

### Treatment Recommendations

All horses should be included in a regular parasite control program. Because reinfection is common, treatment must be repeated routinely for effective control. Consult a veterinarian if there is a heavy worm burden in the horse, or if the worming program of the horse is unknown.

### Precautions

- It is not recommended to use in foals under 6 weeks of age.

Mix into food as required

*Ponies, weanlings:* 60g once daily

*Light horses (300 kg):* 90g once daily

*Medium horses (400 to 500 kg):* 60g twice daily

*Heavy horses (600 kg):* 90g twice daily

### Treatment Recommendations

Each 90g dose of Biotin Hoof Growth Supplement will give 16mg of biotin. Treatment should be continued for 6 – 9 months for maximum therapeutic effect.

PHYSICAL CHARACTERISTICS	Fine granular powder
PACK SIZES	5kg (VAL0700), 20kg (VAL0703) with 30g scoop included
STORAGE	Store below 25°C Store in a dry place Replace lid tightly after use

# Methionine Tablets

## Methionine supplement for dogs

### General Description

Amino acid associated with skin and nail strength.

ACTIVE CONSTITUENTS	per tablet
dL-Methionine	500mg

### Features & Benefits

- Aids the liver in detoxification mechanisms.
- Helps strengthen pads and brittle nails, as well as general skin and nail strength and production.
- Antioxidant.

### Directions for Use

*General skin and nail strength:* 1 tablet per 10kg bodyweight daily with food or as directed by a veterinarian.

PHYSICAL CHARACTERISTICS	White tablet
PACK SIZES	Jar 500s (VAL4915)
STORAGE	Store below 30°C Keep container tightly closed

# Omega 3 & 6 Plus 9 Oil

## Nutritional Supplements

An essential fatty acid (EFA) supplement for dogs and cats

ACTIVE CONSTITUENTS	per g
Omega 3 fatty acids (Linolenic Acid)	225mg
Omega 6 fatty acids (Linoleic Acid)	210mg
Omega 9 fatty acids (Oleic Acid)	480mg
dl- $\alpha$ -tocopheryl acetate (Vitamin E)	1mg

### Features & Benefits

- Contains the correct balance of Omega 3, 6 and 9 oils. The combination of all three omega oils ensures that EFAs are absorbed in the correct ratio. Diets rich in omega 6 can suppress omega 3, while omega 9 dilutes the amount of omega 6 thereby ensuring the correct ratio of omega oils is maintained.
- As essential fatty acids are easily destroyed, particularly by light, Omega 3 & 6 Plus 9 Oil is packed in a 100% UV resistant bottle.

### Directions for Use

*Dogs and Cats:* Administer orally 1g per 7kg bodyweight per day, or as directed by a veterinarian (1g = 1.5mL / 1 pump).

### Recommended Uses

An appropriate ratio of omega 3, 6 and 9 essential fatty acids (EFAs) is necessary to promote general health, as well as a healthy coat and skin. A deficiency of EFAs is a frequent cause of a lustreless coat.

PHYSICAL CHARACTERISTICS	Oil
PACK SIZES	200mL (pump pack) (VAL5390) 1L (bottle) (VAL5391)
STORAGE	Store below 25°C Protect from light Store in a dry place

# Organic Calcium

## Calcium supplement for dogs

### General Description

Provides supplementation for dogs and greyhounds of all ages, where calcium is deficient. Available in tablet and powder formulations.

ACTIVE CONSTITUENTS	per 5g powder
Calcium (as proteinate)	480mg

ACTIVE CONSTITUENTS	per tablet
Calcium (as proteinate)	200mg

### Features & Benefits

- Unique formulations scientifically developed by veterinarians.
- Made with mineral proteinates (highly bio-available), which provide optimal absorption compared to minerals in chemical form.
- Contains no animal by-products.

### Directions for Use

Daily calcium supplement requirement depends on the type of diet being fed.

#### Organic Calcium Tablets - Dog:

- *Meat only diet:* 1 tablet per 2kg bodyweight daily.
- *Mixed diets:* 1 tablet per 4 - 6kg bodyweight daily. Alternatively, give 1 tablet per 100g of meat fed daily.
- *Dry food only diet:* 1 tablet per 8kg bodyweight daily.

#### Organic Calcium Powder (scoop provided = 5g) - Dog:

- *Meat only diet:* 1 scoop per 4kg bodyweight daily.
- *Mixed diets:* 1 scoop per 8 - 12kg bodyweight daily. Alternatively, give 1 scoop per 200g of meat fed daily.
- *Dry food only diet:* 1 scoop per 16kg bodyweight daily.

PHYSICAL CHARACTERISTICS	Powder and tablet formulations
PACK SIZES	450g powder (VAL5451)
	3kg powder (VAL5452)
	100 tablets (VAL5455)
	500 tablets (VAL5456)
STORAGE	Store in a dry place below 30°C

# Organic Iron & Trace Mineral Tablets

Nutritional  
Supplements

## Iron and trace mineral supplement for dogs

### General Description

Source of iron and minerals for greyhounds and dogs of all ages to supplement diets that may be deficient.

ACTIVE CONSTITUENTS	per tablet
Iron (as proteinate)	39mg
Copper (as proteinate)	1.2mg
Cobalt (as proteinate)	5mg
Zinc (as proteinate)	33mg

### Features & Benefits

- Made with mineral proteinates (highly bio-available), which provide optimal absorption compared to minerals in chemical form.

### Directions for Use

Dog: Give 1 tablet per 30kg bodyweight daily.

### Recommended Uses

Contains iron, copper and cobalt to maximise a dog's potential to produce essential blood elements. The inclusion of zinc helps with bone, tendon and ligament development.

PHYSICAL CHARACTERISTICS	Tablet
PACK SIZES	100 tablets (VAL5475)
	500 tablets (VAL5476)
STORAGE	Store in a dry place below 30°C

# Organic Vitamin & Mineral Powder

## Vitamin and mineral supplement for dogs

### General Description

Provides essential vitamins, minerals, calcium and amino acids, for dogs and greyhounds of all ages, to supplement diets which may be deficient.

ACTIVE CONSTITUENTS per 5g			
Calcium Proteinate	600mg	Thiamine (Vitamin B1)	0.14mg
Calcium Carbonate	200mg	Manganese (as proteinate)	0.7mg
Retinol (Vitamin A)	0.15mg	Magnesium (as proteinate)	55mg
Iron (as proteinate)	4.4mg	Riboflavin (Vitamin B2)	0.24mg
Zinc (as proteinate)	4.9mg	Pyridoxine (Vitamin B6)	0.15mg
Cholecalciferol (Vitamin D3)	1.4µg	Cobalt (as proteinate)	0.14mg
Tocopherol (Vitamin E)	3mg	Cyanocobalamin (Vitamin B12)	2.5µg
Copper (as proteinate)	0.4mg		

### Features & Benefits

- Made with mineral proteinates (highly bio-available), which provide optimal absorption compared to minerals in chemical form.
- Safe to use with racing greyhounds.

### Directions for Use

Growing puppies, pregnant and lactating bitches, stud dogs: 1 level scoop (5g scoop provided) per 5kg bodyweight daily.  
Adult dogs: 1 level scoop per 10kg bodyweight daily.

PHYSICAL CHARACTERISTICS	Powder
PACK SIZES	450g (VAL5491)
	3kg (VAL5492)
STORAGE	Store in a dry place below 30°C

# Organic Vitamin & Mineral Tablets

## Nutritional Supplements

Vitamin and mineral supplement for dogs 

### General Description

Nutritional supplement to aid vitamin, mineral, and amino acid deficiencies in dogs and greyhounds of all ages.

ACTIVE CONSTITUENTS per tablet			
Magnesium	55mg	Cholecalciferol (Vitamin D3)	1.25µg
Iron	4.4mg	Tocopherol (Vitamin E)	3mg
Zinc	4.9mg	Thiamine (Vitamin B1)	0.14mg
Copper	0.4mg	Riboflavin (Vitamin B2)	0.25mg
Manganese	0.7mg	Pyridoxine (Vitamin B6)	0.15mg
Iodine	0.1mg	Cyanocobalamin (Vitamin B12)	2.5µg
Retinol (Vitamin A)	0.15mg	Cobalt	0.14mg

### Features & Benefits

- Highly palatable.
- Made with mineral proteinates (highly bio-available), which provide optimal absorption compared to minerals in the chemical form.
- Safe to use with racing greyhounds.

### Directions for Use

*Growing puppies, pregnant and lactating bitches, stud dogs:* 1 tablet per 5kg bodyweight daily.

*Adult dogs:* 1 tablet per 10kg bodyweight daily.

\*Unlike the powder formulation, Organic Vitamin and Mineral tablets do not contain calcium.

PHYSICAL CHARACTERISTICS	Tablet
PACK SIZES	100 tablets (VAL5495)
	500 tablets (VAL5496)
STORAGE	Store in a dry place below 30°C

# 4 Calming Paste

## Nutritional supplement for horses and dogs

### General Description

Nutritional supplement containing magnesium, tryptophan, B-group vitamins and chamomile for horses and dogs.

ACTIVE CONSTITUENTS per 30mL			
Magnesium	4,300mg	Niacin (Vitamin B3)	500mg
L-Tryptophan	3,000mg	Pyridoxine (Vitamin B6)	300mg
Thiamine (Vitamin B1)	600mg	Matricaria recutita (chamomile)	4,500mg
Riboflavin (Vitamin B2)	500mg		

### Features & Benefits

- Suitable for use as a training tool when an animal is being trained out of a particular behaviour.
- Easy to use paste.
- Safe to use on pregnant, breeding or lactating animals.
- Palatable with high acceptance in both dogs and horses.

### Directions for Use

*Horses:* Give ½ - 1 tube per 500kg bodyweight in food.

*Dogs:* 1/2mL – 1mL per 10kg bodyweight in food.

Give 20 – 40 minutes before exercise or travel. May be repeated in 5-6 hours if required.

PHYSICAL CHARACTERISTICS	Paste
PACK SIZES	30mL tube (VAL1190)
STORAGE	Store below 30°C

# activiron™ Paste

## Performance Products

Highly bio-available oral iron supplement for horses

ACTIVE CONSTITUENTS	per 20mL
Iron as ferric sodium EDTA (NaFeEDTA)	400mg

### Features & Benefits

- Utilises a superior form of bio-available iron (NaFeEDTA) that contains a unique jacketed coating, and offers several significant advantages over other iron formulations, including those with chelated iron.
- Higher absorption rate in the body.
- Highly bio-available iron without the need for injections.
- No negative impact on the bio-availability of other minerals and vitamins, including Vitamin E.
- Highly palatable caramel flavour paste - no metallic taste.
- No adverse reactions or risk of iron overload.
- Minimal gastrointestinal disturbances.
- An aid in the prevention and treatment of iron deficiency and depletion for horses on grain based diets.

### Directions for Use

*Horse:* Give 20mL three times a week for two weeks as a course over the tongue, in feed or as directed by a veterinarian.  
For a more specific dose based on the horse's individual iron requirements, blood testing may be required.

PHYSICAL CHARACTERISTICS	Caramel flavoured paste
PACK SIZES	60mL tube (3 doses) (VAL0150) 900mL tub (45 doses) (VAL0151)
STORAGE	Store below 30°C away from light

# activiron™ Performance Plus Powder

## General Description

**Activiron™** Performance Plus is your specialist all-in-one iron, blood building, health and vitality supplement for performance horses of all levels. It combines selected premium organic trace minerals, vitamins, essential amino acids, micronutrients and coenzymes which work together to maximise bio-availability and nutritional uptake, as well as to support the specific needs of the performance horse.

ACTIVE CONSITUENTS per 30g					
Iron (Fe) as ferric sodium EDTA (activiron)	250mg	Biotin	500µg	Vitamin B12	100µg
Selenium (organic)	500µg	Folic acid	50mg	Glycine	200mg
Cobalt (organic)	500µg	Vitamin B1	100mg	Lysine	200mg
Copper (organic)	25mg	Vitamin B2	50mg	Methionine	200mg
Manganese (organic)	100mg	Nicotinic Acid (Vitamin B3)	300mg	Choline	50mg
Zinc (organic)	50mg	Panthenic Acid (Vitamin B5)	100mg	Inositol	100mg
Vitamin E	1000µg	Vitamin B6	100mg	Lutein	25mg

## Features & Benefits

- Economical – no need to use several different supplements.
- The vitamins and minerals have been carefully selected to address the needs of horses in intense training.
- Low dose rate - a palatable powder formulation that requires as little as 30g a day for horses in hard work.

## Directions for Use

Mix the required amount into horse’s feed daily or as directed by your veterinarian:

- Race horses 30g
- Breeding stallions 60g
- Ponies 15g
- Performance horses 30g
- Yearlings in sale preparation 30g
- Horses in poor condition or recovering from illness 60g
- Endurance horses 30g
- Lactating mares 30g

PHYSICAL CHARACTERISTICS	Powder
PACK SIZES	1.75kg (58 doses) (VAL0160)
	3.5kg (116 doses) (VAL0161)
	8kg (266 doses) (VAL0162)
STORAGE	Store below 25°C in a dry place

# Liquid Iron

## Performance Supplements

### Liquid iron supplement for horses and dogs

#### General Description

A supplementary source of iron and minerals for horses and dogs.

ACTIVE CONSTITUENTS	per L
Iron (as iron proteinate, iron ammonium citrate and ferrous gluconate)	10g
Manganese (as manganese sulfate)	500mg
Copper (as copper sulfate)	20mg
Cobalt (as cobalt sulfate)	1.5mg

#### Features & Benefits

- Contains three soluble forms of iron, together with the blood building co-factors copper and cobalt, which are essential for red blood cell and haemoglobin production.
- Palatable caramel flavour.

#### Directions for Use

Administer daily in food, or as directed by a veterinary surgeon.

- *Horses:* 40mL/450kg bodyweight
- *Dogs, Greyhounds:* 1mL/10kg bodyweight

#### Recommended Uses

Iron helps keep blood cells healthy in high activity situations, like competition and heavy training. Animals that have healthy blood cells are more likely to maintain their peak performance.

#### Precautions

- This product contains copper and should be administered with caution.
- Avoid giving with any Vitamin E supplement. Where both are required, give Vitamin E in the morning and the iron supplement in the evening.

PHYSICAL CHARACTERISTICS	Caramel flavoured liquid
PACK SIZES	1L (VAL4280), 5L (VAL4282) and 20L (VAL4284)
STORAGE	Store below 30°C Keep container tightly closed

# Vitamin B Complex Injection

## Injectable Vitamin B complex for horses and dogs

### General Description

To aid in Vitamin B complex deficiency in horses and dogs.

ACTIVE CONSTITUENTS	per mL
Thiamine Disulfide Nitrate (Vitamin B1)	20mg
Riboflavin (Vitamin B2)	5mg
Nicotinamide (Vitamin B3)	60mg
Pyridoxine Hydrochloride (Vitamin B6)	20mg
Pantothenate (Vitamin B5)	20mg
Hydroxocobalamin (Vitamin B12)	200µg

### Features & Benefits

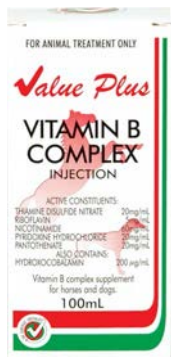

- Contains Vitamins B1, B2, B3, B5, B6 and B12.

### Directions for Use

Administer by intramuscular injection twice weekly or as directed by a veterinary surgeon.

Horses: 5 - 10mL

Dogs: 1 - 2mL

PACK SIZES	100mL (multi dose vial) (VAL9330)
STORAGE	Store below 25°C Protect from light

# Vitamin B1 Injection

## Injectable Vitamin B1 for horses and dogs

### General Description

To aid in Vitamin B1 deficiency in horses and dogs.

ACTIVE CONSTITUENTS	per mL
Thiamine HCl (Vitamin B1)	125mg

### Features & Benefits

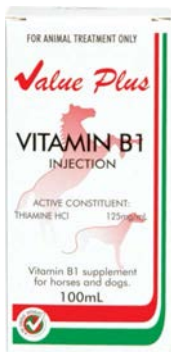

- Thiamine (Vitamin B1) is required by every cell in the body to produce the fuel that the body runs on adenosine triphosphate (ATP). Thiamine processes protein, carbohydrates and fat. It plays a role in sustaining metabolism and in assisting in the maintenance of normal appetite and bodyweight.

### Directions for Use

Administer by intramuscular injection twice weekly or as directed by a veterinary surgeon.

Horses: 5 - 10mL

Dogs: 1 - 2mL

PACK SIZES	100mL (multi dose vial) (VAL9320)
STORAGE	Store below 25°C Protect from light

# Vitamin B12 Injection

## Injectable Vitamin B12 for horses and dogs

### General Description

To aid in Vitamin B12 deficiency in horses and dogs.

ACTIVE CONSTITUENTS	per mL
Cyanocobalamin	1,000µg

### Features & Benefits

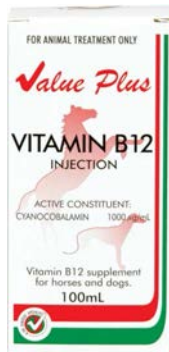

- Vitamin B12 is essential for the formation of folic acid.
- Cyanocobalamin (B12) has a role in the formation of red and white blood cells as well as general haemoglobin production.

### Directions for Use

Administer by intramuscular injection twice weekly or as directed by a veterinary surgeon.

*Horses:* 5 - 10mL

*Dogs:* 1 - 2mL

PACK SIZES	100mL (multi dose vial) (VAL9325)
STORAGE	Store below 25°C Protect from light

# Vitamin C Injection

## Injectable Vitamin C for horses and dogs

### General Description

Supplement to aid in Vitamin C deficiency in horses and dogs.

ACTIVE CONSTITUENTS	per mL
Ascorbic Acid	500mg

### Features & Benefits

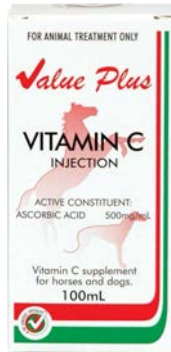

- Vitamin C aids in general metabolism and in the formation of red blood cells. It also has a role in maintaining healthy cartilage, tendons and bone.
- Even though Vitamin C is synthesised naturally by the body, supplementation may be required if the animal is suffering from an illness or injury, or is in a high activity environment.

### Directions for Use

Administer by intramuscular injection twice weekly or as directed by a veterinary surgeon.

*Horses:* 5 - 10mL

*Dogs:* 1 - 2mL

PACK SIZES	100mL (multi dose vial) (VAL9380)
STORAGE	Store below 25°C Protect from light

# Folic Acid Injection

## Injectable Folic Acid for horses and dogs

### General Description

Injectable Folic Acid supplement for horses and dogs.

ACTIVE CONSTITUENTS	per mL
Folic Acid	15mg

### Features & Benefits

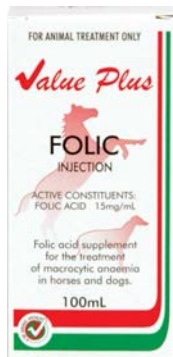

- Folic Acid helps prevent and treat macrocytic anaemia; a result of Folic Acid and Vitamin B12 deficiency. Folic Acid is involved in the formation of red and white blood cells as well as general haemoglobin production.

### Directions for Use

Administer by intramuscular injection twice weekly or as directed by a veterinary surgeon.

Horses: 5 - 10mL

Dogs: 1 - 2mL

PACK SIZES	100mL (multi dose vial) (VAL2650)
STORAGE	Store below 25°C Protect from light

# Folic B12 Injection

## Injectable Vitamin B12 for horses and dogs

### General Description

For the prevention and treatment of macrocytic anaemia in horses and dogs.

ACTIVE CONSTITUENTS	per mL
Folic Acid	15mg
Cyanocobalamin	500µg

### Features & Benefits

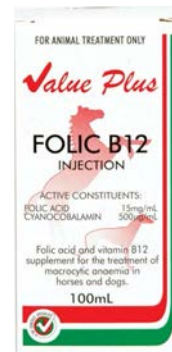

- Both Folic Acid and Vitamin B12 are beneficial for the formation of red and white blood cells as well as for general haemoglobin production. Vitamin B12 is also an essential component for the formation of Folic Acid.
- Folic Acid and Vitamin B12 are required for the prevention and treatment of macrocytic anaemia. Macrocytic anaemia is a result of Folic Acid and Vitamin B12 deficiency.

### Directions for Use

Administer by intramuscular injection twice weekly or as directed by a veterinary surgeon.

Horses: 5 - 10mL

Dogs: 1 - 2mL

PACK SIZES	100mL (multi dose vial) (VAL2660)
STORAGE	Store below 25°C Protect from light

# Vitamin B Complex Powder

Performance  
Supplements

## B group vitamin supplement for horses and dogs

### General Description

B group vitamin supplement for horses and dogs where their diet is deficient.

ACTIVE CONSTITUENTS per kg			
Thiamine HCl (Vitamin B1)	12.5g	Pyridoxine HCl (Vitamin B6)	20g
Riboflavin (Vitamin B2)	1.25g	Cyanocobalamin (Vitamin B12)	0.5mg
Nicotinic Acid (Vitamin B3)	1g	Calcium Gluconate	10g

### Features & Benefits

- B-Group Vitamins are vital for strong muscles, good appetite and general health and vigour. B-Group Vitamins are recommended for animals under intense situations, in hard work or that are regularly racing or travelling. B-Group Vitamins are beneficial in aiding recovery post exertion, sickness or worming treatments.
- Palatable vanilla flavour.
- Glucose base.

### Directions for Use

Using small end of scoop provided, 1 measure = 3.5g.

*Horses:* 2 to 3 scoops, daily in moist food.

*Dogs, greyhounds:* ½ to 1 scoop daily in food or liquid.

PHYSICAL CHARACTERISTICS	Vanilla flavoured powder
PACK SIZES	500g (VAL9340), 3kg (VAL9343) 15kg (VAL9346)
STORAGE	Store below 30°C Protect from moisture Replace lid tightly after use

# Vitamin E Powder (natural)

## Vitamin E supplement for horses and dogs

### General Description

A natural Vitamin E supplement for horses and dogs.

ACTIVE CONSTITUENTS	per g
d- $\alpha$ -Tocopheryl acid succinate	62.5iu (52mg)

### Features & Benefits

- Natural form of Vitamin E which is more readily absorbed into the body.
- For the treatment and prevention of Vitamin E deficiency in horses and dogs.

### Directions for Use

Give daily mixed in with feed. Scoop is provided: small end = 220iu (3.5g), large end = 1,000iu (16g).

*Horses:* 1,000iu or as required.

*Dogs, greyhounds:* 50iu or as required.

### Recommended Uses

Vitamin E is an anti-oxidant, which helps to maintain general health, reproduction, athletic performance and vitality.

### Precautions

- Avoid giving with any iron supplement. Where both are required, give Vitamin E in the morning and the iron supplement in the evening, or administer on alternate days.

#### PHYSICAL CHARACTERISTICS

Powder

#### PACK SIZES

250g (VAL9772), 500g (VAL9773)  
1kg (VAL9774), 2.5kg (VAL9775)  
5kg (VAL9776)

#### STORAGE

Store below 30°C  
Protect from light

# Electrolytes

## Advanced electrolyte replacer for horses

### General Description

Hydracel physiological electrolyte formula is designed to replace essential electrolyte ions lost through sweat, to encourage thirst and fluid intake, and to optimise both equine performance and recovery.

ACTIVE CONSTITUENTS per kg			
Sodium	222g	Betaine anhydrous	16g
Chloride	485g	Palatinose™	87g
Magnesium	17g		

### Features & Benefits

Unlike most traditional electrolyte replacers, Hydracel incorporates two additional unique ingredients: Betaine anhydrous (a natural osmolytic agent) and Palatinose™ (an advanced Low GI natural energy source), which make this advanced electrolyte multi-functional.

- Replaces important electrolytes lost through hard work.
- Proactive and supports a rapid recovery.
- Encourages the horse to recoup from fluid loss (at a cellular level).

Palatinose is a functional carbohydrate that is highly digestible yet provides a prolonged and balanced energy release of glucose. It acts as a sustained Low GI fuel source for peak performance and is a superior option to simple sugar alternatives such as dextrose.

### Directions for Use

Mix the required amount into the horse's feed daily. A 30g scoop is included in every bucket of Hydracel. Hydracel can also be dissolved into water at the rate of 45g per 25L of water.

*Light work:* 30g (1 scoop)

*Medium work:* 60g (2 scoops)

*Heavy work:* 90g (3 scoops)

PHYSICAL CHARACTERISTICS	Powder
PACK SIZES	2kg (VAL3100), 5kg (VAL3103) 15kg (VAL3106)
STORAGE	Store in a dry place below 30°C Protect from moisture Replace lid tightly after use

# Balanced Salts

## Electrolyte replacer for horses

### General Description

An electrolyte replacer with essential balanced salts to provide the appropriate levels not received through a horse’s normal diet.

ACTIVE CONSTITUENTS per kg			
Potassium	103.85g	Bicarbonate	193.87g
Sodium	196.78g	Sulfate	39.1g
Chloride	262.3g	Magnesium	2.11g

### Features & Benefits

- Maintains normal electrolyte balance in the horse’s body tissue during heavy exercise.
- Assists with the horse’s recovery after strenuous exercise.

### Directions for Use

Administer 50g (2 measures of scoop provided) in the feed daily, in drinking water, or as directed by a veterinarian.  
Ensure clean drinking water is available at all times.

### Precautions

- *Racing:* The regulations of the relevant authority regarding medication should be observed.

PHYSICAL CHARACTERISTICS	Apple flavour powder
PACK SIZES	2.5kg (VAL0513), 5kg (VAL0516) 15kg (VAL0518)
STORAGE	Store below 30°C Protect from moisture Replace lid tightly after use

# Electrolyte 2 Paste

## Electrolytes

### Electrolyte replacer for horses

#### General Description

Electrolyte and vitamin paste for horses to replenish key nutrients lost through sweating during exercise or travelling.

ACTIVE CONSTITUENTS per 60mL			
Potassium	5,000mg	Pyridoxine (Vitamin B6)	10mg
Magnesium	1,500mg	Cyanocobalamin (Vitamin B12)	40µg
Calcium	1,200mg	Niacin (Vitamin B3)	300mg
Sodium	4,000mg	Folate	20mg
Thiamine (Vitamin B1)	100mg	Vitamin E	1,000µ
Riboflavin (Vitamin B2)	100mg		

#### Features & Benefits

- Replaces electrolytes lost through intense work.

#### Directions for Use

*Horse:* Give 30mL per 500kg bodyweight after moderate exercise or travelling. For heavy exercise or sweating, repeat after 20-40 minutes.

#### Precautions

- Always ensure access to clean water before and after dosing.

PHYSICAL CHARACTERISTICS	Paste
PACK SIZES	60mL tube (VAL2480)
STORAGE	Store below 30°C

# Electrolyte Liquid for Greyhounds

## Palatable electrolyte liquid for greyhounds

### General Description

A concentrated oral electrolyte solution for greyhounds that may aid in restoring electrolyte and fluid levels depleted through hard work, travelling or panting during hot weather.

ACTIVE CONSTITUENTS per L			
Potassium	30g	Magnesium	3g
Sodium	28g	Sulfate	12g
Citrate	35g	Phosphate	17g
Chloride	43g	Glucose	260g

### Features & Benefits

- Highly palatable cheese flavour.
- Can be used immediately - no need to wait for the dog's next meal to replenish any electrolytes that may have been lost.
- Suitable for any breed of dog or discipline.
- Chamber pack bottle allows for accurate dosing.

### Directions for Use

*Before racing:* Mix 5mL into 125mL of cool, clean water and offer as a drink after travelling, prior to kennelling.

*After racing:* Mix 10mL into 250mL of cool, clean water and offer as a drink during the cooling down period.

*Hot weather & lactating bitches:* 40mL/L water prepared as a bulk solution which can be given as an alternative to drink in conjunction with fresh water.

### Precautions

- Ensure an adequate supply of clean, fresh drinking water is available after consumption.
- Do not exceed the greyhounds racing weight range.

PHYSICAL CHARACTERISTICS	Cheese flavour liquid concentrate
PACK SIZES	1L Chamber Pack (VAL2464)
STORAGE	Store below 30°C Replace cap tightly after use Protect from freezing

# Electrolyte Liquid for Horses

## Electrolytes

### Palatable electrolyte liquid for horses

#### General Description

A concentrated oral electrolyte solution that may aid in restoring electrolyte and fluid levels depleted through hard work and sweat loss during racing, competition, training, travelling, hot weather or illness for horses.

ACTIVE CONSTITUENTS per L			
Potassium	30g	Magnesium	2.9g
Sodium	40.4g	Sulfate	11.5g
Chloride	64g	Phosphate	22.7g
Citrate	30.5g	Glucose	260g

#### Features & Benefits

- Rapidly replaces body salts and fluids lost in sweat without the horse having to wait for a meal in order to replace the salts.
- Palatable apple flavour.

#### Directions for Use

*Horses 450 - 500kg:* Concentrated oral syringe administration (after exercise):

- *Light work:* 40mL
- *Moderate work:* 60mL
- *Heavy work, heavy sweat loss and dehydration:* 80mL

Drinking water administration:

- *Light work:* 40ml in 2L water
- *Moderate work:* 60mL in 3L water
- *Heavy work, heavy sweat loss and dehydration:* 80mL in 4L water

#### Precautions

- Ensure an adequate supply of clean, fresh drinking water is available at all times.

#### PHYSICAL CHARACTERISTICS

Apple flavour liquid concentrate

#### PACK SIZES

1L Chamber Pack (VAL2472)  
5L (VAL2473), 20L (VAL2475)

#### STORAGE

Store below 30°C  
Replace cap tightly after use  
Protect from freezing

# Full-Sweat Electrolyte

## Electrolyte replacer for heavy sweating horses

### General Description

An acid electrolyte replacer for horses in hot or humid conditions. This acid base acts as a buffer to alkalosis, which is caused by heavy sweating. Full-Sweat helps to prevent dehydration, as well as correcting fluid balance.

ACTIVE CONSTITUENTS per kg			
Sodium ions	114.1g	Ammonium ions	32g
Potassium ions	204.6g	Chloride ions	424.3g
Magnesium ions	8.6g	Glucose	20g
Calcium ions	38.4g		

### Features & Benefits

- Specifically formulated acid electrolyte replacer for horses in hot or humid conditions.
- Suitable for horses that suffer from electrolyte depletion through heavy sweating due to prolonged endurance exercise.

### Directions for Use

*Horses (450 kg):* to replace electrolytes lost through heavy sweating, mix 45g into the feed daily. Dose may be divided between morning and evening feeds. Alternatively, Full-Sweat can be administered as a drench following exercise, or mixed into the drinking water:

*Drench:* (30g scoop provided) Maximum of 90g in 4L of water.

*Drinking water:* Dissolve 45g in 25L of water.

### Recommended Uses

Aids in the treatment of alkalosis, hypochloraemia and dehydration (when administered in water), as well as correcting fluid balance. Recommended for horses that work at a moderate speed over extended periods, as well as for horses that sweat excessively (including pacers, eventers, endurance horses, dressage horses, polo, show jumpers, general performance horses and horses involved in extensive trotting or cantering).

### Precautions

- Use care when administering to horses with high blood potassium levels.
- Do not mix with alkaline salts.
- Ensure an adequate supply of clean, fresh drinking water is available at all times.

PHYSICAL CHARACTERISTICS	Powder
PACK SIZES	2.5kg (VAL2700), 5kg (VAL2702) 15kg (VAL2705)
STORAGE	Store below 30°C Protect from moisture

# Buzz Off® Antiseptic and Fly Repellent Cream

**Antiseptic and fly repellent cream for horses, dogs and cats**

## Grooming & Insecticidal

### General Description

Buzz Off contains a combination of insect repellents and insecticides that effectively blind the insect's senses. It creates a resistant barrier between the animal and the insect, repelling biting insects and protecting wounds from further damage. Buzz Off also contains an antiseptic to help prevent infections and assist with wound healing.

ACTIVE CONSTITUENTS per kg			
Diethyltoluamide	66.6g	N-Octyl Bicycloheptene Dicarboximide	8.3g
Di-n-Propyl Isocinchomeronate	25g	Pyrethrins	1g
Piperonyl Butoxide	10g		

### Features & Benefits

- Combines three insect repellents, one insecticide and two synergists to provide a strong killing and repelling action against mosquitoes, flies and other nuisance insects.
- Antiseptic - can be used on cuts, scratches, around wounds and on already bitten ears..
- Easy to use cream formulation in a handy sized tube.

### Directions for Use

*Dogs, cats:* Apply a thin smear to the ears and back of the animal. It can be freely applied around wounds and on already bitten ears.

*Horses:* Use around head and flanks, taking care not to get cream into the eyes.

### Precautions

- Should not be used on animals under 12 weeks of age.

PHYSICAL CHARACTERISTICS	Cream
PACK SIZES	75g tube (VAL0990)
STORAGE	Store below 30°C away from light

# Fly Spray

## Insecticidal and insect repellent spray for horses, dogs, cats, cattle and pigs

### General Description

A non-sting insect and repellent spray that repels flies and mosquitoes on horses, dogs, cattle and pigs. Controls fleas (*Ctenocephalides* sp.) and lice (*Heterodoxus* sp., *Linognathus* sp., *Trichodectes* sp. and *Felicola* sp.) on dogs and cats.

ACTIVE CONSTITUENTS per L			
Di-N-propylisocinchomeronate	6.0g	Piperonyl Butoxide	2.7g
Pyrethrins	1.5g	Citronella Oil	5.0g
N-octylbicycloheptene dicarboximide	3.0g		

### Features & Benefits

- Low irritant, non-alcohol and non-flammable base.
- Contains pyrethrins and citronella oil.
- Easy spray on application.
- Longer lasting than alcohol based products.
- Ideal for sensitive skin.

### Directions for Use

Apply sparingly to the coat of the animal using the spray nozzle or a cloth dampened with Fly Spray. Use once daily, or twice if infestation is severe. Spray areas where fleas are likely to breed (i.e. kennels, bedding).

### Precautions

- It is not recommended for use on animals under 12 weeks of age.
- Avoid direct application to eyes, nose and mouth.

PHYSICAL CHARACTERISTICS	Liquid
PACK SIZES	125mL (VAL2601), 500mL (VAL2602) 5L (VAL2605)
STORAGE	Store below 30°C

# Stable & Kennel Disinfectant

Grooming &  
Insecticidal

## General use cleaner and disinfectant

### General Description

Cleaner and disinfectant for kennels, stables, aviaries and poultry cages, with pleasant bubblegum scent.

ACTIVE CONSTITUENTS	per L
Benzalkonium Chloride	30g

### Directions for Use

Dilute 25mL of disinfectant per 1L of clean water. To apply, remove as much surface dirt as possible before applying diluted solution. Scrub or swab diluted solution into the surface. After five minutes wash off with clean water.

### Recommended Uses

Benzalkonium Chloride has a proven broad spectrum activity as a bactericide and fungicide. It may also be used in toilets (non septic systems) and on household floors and walls.

### Precautions

- Wear gloves when preparing dilution and while applying the product.
- Controls only surface bacteria. Does not kill Parvovirus.
- DO NOT mix with detergents or other chemicals.
- DO NOT use in septic systems.
- Not to be used for any purpose or in any manner contrary to this label unless authorised under appropriate legislation.

PHYSICAL CHARACTERISTICS	Clear, pinkish-red solution bubblegum scent
PACK SIZES	5L (VAL2020), 20L (VAL2025)
STORAGE	Store below 30°C Store in original container Protect from direct sunlight

# Lustre Pet

## General Description

Coat conditioner, grooming aid, cologne and deodorant spray for dogs and cats.

## Features & Benefits

- 3 different uses: coat conditioner, cologne and deodorant spray.
- Long lasting scent that neutralises odours.
- Adds shine and lustre to the coat.

## Directions for Use

Spray over coat as required, holding bottle at least 25cm away from coat to ensure even coverage.

## Precautions

- Avoid spraying into the animals eyes.

PHYSICAL CHARACTERISTICS	Liquid
PACK SIZES	250mL (VAL4490), 500mL (VAL4491) 5L (VAL4495)
STORAGE	Store below 30°C

# Lustre Vet

## General Description

Coat conditioner, grooming aid, cologne and deodorant spray for dogs and cats.

## Features & Benefits

- VET ONLY
- 3 different uses: coat conditioner, cologne and deodorant spray.
- Long lasting scent that neutralises odours.
- Adds shine and lustre to the coat.

## Directions for Use

Spray over coat as required, holding bottle at least 25cm away from coat to ensure even coverage.

## Precautions

- Avoid spraying into the animals eyes.

PHYSICAL CHARACTERISTICS	Liquid
PACK SIZES	250mL (VAL4500), 500mL (VAL4501) 5L (VAL4505)
STORAGE	Store below 30°C

# Pet Shampoo

## General Description

A gentle soap-free shampoo suitable for everyday use.

## Features & Benefits

- Honey and almond scented.
- Soap free.
- Gentle on the skin.
- Leaves the coat soft and shiny.
- Will not strip the oil from the dog's or cat's coat, so is suitable for animals using spot on flea treatments.

## Directions for Use

Wet coat thoroughly with clean water and pour at least 20mL of shampoo along the backline of the animal. Work into a lather over the entire body. Rinse off and dry thoroughly. Use weekly or more frequently if necessary.

## Precautions

- Avoid contact with the animal's eyes and wetting inside the ears.

PHYSICAL CHARACTERISTICS	Honey and almond scented liquid
PACK SIZES	500ml (VAL7580), 1L (VAL7581) 5L (VAL7582), 20L (VAL7583)
STORAGE	Store below 25°C

# Horse & Cattle Shampoo

## General Description

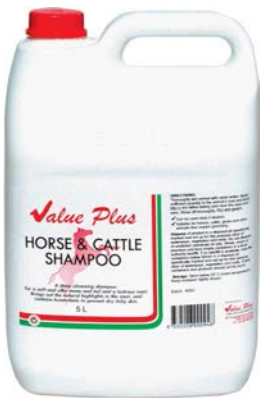

A deep cleansing shampoo for a soft and silky mane and tail and a lustrous coat. Suitable for horses, cattle, goats and other animals that require grooming.

## Features & Benefits

- Brings out the natural highlights in the coat.
- Soap free.
- Gentle on the skin.
- Can be safely used in conjunction with externally applied parasite treatment products.

## Directions for Use

Thoroughly wet animal with clean water. Apply sufficient quantity of the shampoo to the animal's coat and work into a rich lather, taking care near the eyes and ears. Rinse off thoroughly. Dry and groom.

PHYSICAL CHARACTERISTICS	Liquid
PACK SIZES	1L (VAL7551), 5L (VAL7552) 20L (VAL7553)
STORAGE	Store below 25°C Keep container tightly closed
